GENERAL NOTES

- All dimensions are in inches.
- Phenolic coated coils require a longer lead-time since they must be re-tested after coating.
- .375 inch mounting holes will be provided on 6 inch centers from the centerline of the fin height and finned length. Not available when S < 0.75 inches.
- The supply line should be connected to the lower connection on the leaving air side for counterflow operation.
- Coils will vent and drain through factory-installed vent and drain fittings when mounted level for horizontal flow.
- Connection location other than standard could affect vent and drain locations. Consult factory.
