

## CENTRIFUGAL FANS

# RELIABLE & EFFICIENT EXHAUST

CaptiveAire's centrifugal fans safely and efficiently exhaust air from the building. Centrifugal upblast fans are grease rated and centrifugal downblast fans are well-suited for a variety of general ventilation applications. Both varieties are ideal for exhausting air under moderate static pressures.

### Robust Construction

- Spun aluminum housing for rust-free, weather resistant durability
- Completely enclosed, ventilated direct drive motor compartment
- Aluminum or steel backward inclined wheels, blades, and inlets
- Dedicated wire chase for electrical connections

### Variety of Options

- Variable speed control with VFDs and EC motors available
- Emergency disconnect switch (Size 12 and larger)
- Wall or roof mount
- Vented and non-vented roof curbs available

### Easy Cleaning

- Quick release latches for easy access to motor compartment
- Grease collection box
- Base hinging kit and hinged sub base available
