

**ND-2 SELF-CLEANING HOOD****SELF-CLEANING
EVERY DAY**

CaptiveAire's ND-2 flagship exhaust hood uses self-cleaning technology to wash away grease from the plenum and duct through a daily spray cycle. Several accessory options are available to customize the hood to your needs.

**Self-Cleaning**

- Spray bar in the duct and plenum uses hot water and surfactant to wash away grease and reduce fire risk
- Automatic scheduling or manual operation

**Integral Utility Cabinet**

- Manifold and electrical controls directly mounted into the cabinet on the hood
- All piping and wiring done in the factory to minimize labor at job site

**Optional Accessories**

- Perforated Supply Plenum (PSP) with Air Conditioning (AC-PSP) available for efficient make-up air delivery and spot cooling at the hood
- Vertical End Panels (VEPs) available for improved capture and containment and fire safety
- Numerous factory installed lighting options available to fit a variety of applications
