

REMOTE CONNECTED
COMMISSIONING SERVICES™ (CCx)
**COMMISSION
AFTER BUILDING
TURNOVER**

Obtain peak performance with Connected Commissioning Services™ (CCx). After building turnover and certificate of occupancy, CaptiveAire’s engineering team can run a full diagnostic report using CaptiveAire’s remote monitoring system, CASLink. This optimizes the entire system to perform in real world conditions.

Perfect Comfort

- Improved indoor air quality with CCx fine tuning of all systems
- Reduced risk of mold and other microbial activity by optimizing humidity and temperature
- Improved system scheduling using CASLink’s building occupancy and other data

Efficiency Savings

- Lower utility costs by enhancing all systems to run at ideal levels
- CASLink’s complementary building management system eliminates the need for expensive external BMS hardware.

Reliability & Longevity

- Increased equipment longevity from decreased compressor and heater cycling
- Minimized need for emergency maintenance calls
- Paragon HVAC includes a second CCx report at the first change of season to ensure Paragon performs perfectly year round.
