

BUILDING MANAGEMENT CDS

CONTROLS DESIGN & INTEGRATION SERVICES

CaptiveAire is pleased to offer CDS, a new package that simplifies installation headaches with dedicated factory-trained engineers who ensure proper integration of equipment into your Building Management System. CaptiveAire controls engineers provide a site-specific product integration guide and a dedicated controls engineering point of contact for BACnet, Lonworks, and Modbus compatible systems.

Streamlined Equipment Setup

- Less labor and headache with equipment setup
- Faster resolution to issues with the controls' sequence of operation
- Reduced risk of change orders and mis-wiring
- A CaptiveAire certified correct installation

Economical Operation

- Decreased utility costs
- Increased equipment longevity from decreased compressor and heater cycling

Healthier Indoor Environment

- Improved occupant comfort and indoor air quality
- Decreased risk of mold and bacterial growth

BACnet® is a trademark of ASHRAE.
