

**HVAC SUPPLY DUCT**

UNIFORM DIFFUSION. ZERO DRAFTS.

CaptiveAire's Air Diffusion Supply Duct maximizes efficiency and comfort. 3D laser-cut holes supply perfectly uniform air for the best possible indoor comfort. Optional insulated double wall duct meets a variety of R value needs. And modular, bolt together construction makes for easy installation.

**Superior Performance**

- Even air diffusion along the entire duct length guarantees uniform temperature throughout the space
- Specially designed hole patterns eliminate drafts and noisy air flow
- Paragon HVAC modulates air discharge temperature using proprietary internal logic to prevent condensation on supply duct
- Double wall duct features inner single wall duct surrounded by insulation and a stainless steel outer shell in a variety of wall thicknesses to cover different R value requirements

**Built to Last**

- Stainless steel construction designed to last for 20+ years
- Modern aesthetic looks great in any open space
- Custom 3D modeled duct layout using multiple hole patterns optimizes the performance for each unique space without separate diffusers
- Perfect for both heating and cooling applications

**Easy Installation**

- No welding required—Factory welded and tested
- Quick assembly on site with bolt-on universal V clamps
- Sections can be rotated to any angle for ideal air flow
- Steel cable hanging system and numbered duct segments makes installation a breeze
- Duct sections are pre gasketed at the factory for leak free assembly SMACNA – Seal Class A, Leakage Class 1
