

**EMERGENCY RELIEF FUNDING**

FUNDING FOR K-12 VENTILATION UPGRADES

The Department of Education is awarding over \$189 billion in funding to K-12 schools. CaptiveAire's Paragon Rooftop Unit (RTU) is an allowable use of funds, meaning you can improve your school's ventilation and filtration to provide a healthy learning environment for your students and staff.

**Superior Air Quality**

- Paragon RTU brings in up to 100% fresh outdoor air and helps exhaust viruses and contaminants continually
- MERV 13 or better filtration provides superior air quality
- High levels of fresh air keeps CO₂ levels low to boost student productivity and focus

**Reliable Comfort**

- Fully modulating and variable components deliver precise temperature and humidity
- 21.3 IEER efficiency rating is over 1.5x the ASHRAE standard
- CaptiveAire modular stainless steel Supply Duct provides zero-draft diffusion customized for every environment
- 5 year standard warranty

**Monitor & Control**

- Monitor just one classroom or a whole school district with real-time data from CaptiveAire's CASLink building management system
- Proactively manage unit configuration with in-depth statistics and history from any location
- CASService provides factory service with a nationwide network of certified technicians
